

Impact of Premium Sport Funding 2016-17

The school has benefited greatly from the sport funding this year.

We funding has abled us to continue to be part of **CSET Sport Partnership** on the enhanced programme, enabling the PLT to attend three partnership meetings to liaise with other PLTs and to share good practice. The partnership has provided high quality coaches to work with the children and staff in school, delivering activities that would not usually be accessed. **Infant Agility** for Years 1 and 2 has been delivered by young leaders from the junior school and has highlighted areas for development in physical development.

We have had the expertise of a professional **gymnastics** coach for a day and have planned in a **dance coach** for Term 5. This has upskilled the teaching staff who have adapted their plans accordingly and feel more qualified to teach gymnastics and dance, ensuring progression throughout the year.

The coaching sessions provided by the **Progressive Sport** coaches have provided high quality PE for the children. Schemes of work have been developed and the lessons have been more joined up, enabling progression throughout the year groups.

Competition has been accessed by participation in the **Olympiad** event (MAD Cluster) ,a **multi skills festival** within the Nexus Schools and entry to **The Festival of Youth Sport** scheduled for June.

The profile of PE in school remains high - there are currently five different after school sport clubs and the children have success in competition regularly. Success is celebrated in the achievement assembly on a Thursday.

Year 2 leaders are being used to deliver play activities during lunchtime sessions to increase physical activity during the lunch break. This also develops leadership skills in our older children.

PE enrichment with the junior school is scheduled for Term 5 which will include all children from both schools, raising the profile of PE and also giving the opportunity to take part in different activities.

The school is trialling commitment to **"Move - a - Mile"** once a week, stepping up physical activity within the class group with more activities and a run around the school field on a Friday afternoon. This will have benefits for the children , increasing their level of fitness and also keeping their brains alert and ready for learning.

BHIS remains committed to PE and has a strong belief that it is a crucial and important part of the curriculum and children's development. The Sport Premium Funding has enabled this to become a reality.
