

Impact of Premium Sport Funding 2017-18

The school has benefited greatly from the sport funding this year.

The funding has enabled us to continue to be part of **CSET Sport Partnership** on the enhanced programme, enabling the PLT to attend three partnership meetings to liaise with other PLTs and to share and reflect on current practice. The partnership has provided high quality coaches to work with the children and staff in school, delivering a range of different activities not usually accessed by the children. As a result of the Sports coaching, the staff have increased their confidence and expertise in delivering PE and are continually being upskilled.

The PE Coordinator was involved in a **Key Stage 1 cluster support group**, provided by CSET to help to develop ideas for competition and to provide support for assessment and evidencing PE and School Sport involvement.

Infant Agility for Years 1 and 2, delivered by young leaders from the junior school (Trained by CSET), has highlighted areas for physical development.

CPD - We have had the expertise of a professional **gymnastics** coach for a day, and had dance training in all year groups by a skilled and talented dance teacher. This has upskilled the teaching staff who have adapted their plans accordingly and feel more qualified to teach gymnastics and dance, ensuring progression throughout the year.

The coaching sessions provided by the **Progressive Sport** coaches have provided high quality PE for the children. We have developed schemes of work and the lessons enable progression throughout the year groups. **Qualified PE coaches have run Lunchtime Sport Clubs** three times a week enabling children to access more PE and Sport and to encourage them to be more active.

Inter School Competition has been accessed by participation in the **Olympiad** event (MAD Cluster), a **multi skills festival, target Festival, throwing and catching festival and striking festival** all within the Nexus Schools Network and also involvement in **The Festival of Youth Sport** in June involving many South Glos Schools.

We have also benefited from tennis coaching from **Frenchay and Downend Tennis Club** and have been part of their scheme, which involves training up the class teachers to deliver tennis coaching alongside the professional coaches. We were involved in more **inter school competition** in a tennis festival at the end of the coaching and we were successful winners of the group!

Year 2 leaders trained by CSET leader Trish Partridge to become Competition Leaders within the school and allowing BHIS to partake in more interschool competition.

We have been able to purchase and become involved with the **Create Real PE Scheme** this year, training attended for three days by the PE Coordinator and the resources trialled in Year One. The Real PE programme will be introduced to the other year groups during the next academic year and an INSET is planned in October to start the process.

We have access, through **Create**, to the **PE Sport and Fitness Wheel**, which is a powerful tool that uploads evidence of PE and Sport achievements and progress towards different goals within BHIS. BHIS is committed to increasing physical activity throughout the school day and is monitoring this with a view to improving levels of daily activity. We canvassed current activity levels as a baseline for the school to improve upon. The school has invested in the **Travel Tracker** system, which records and rewards the children who walk/scoot park and stride to school three times a week.

The profile of PE in school remains high - there are currently five different after school sport clubs and the children have success in competition regularly. We celebrate success in the achievement assembly on a Friday.

BHIS achieved GOLD status after submitting evidence for the KS1 Games Mark at the end of the academic year, one of only a few schools in the local area.

BHIS remains committed to PE and has a strong belief that it is a crucial and important part of the curriculum and children's development.

As a school, we are committed to increasing the overall fitness and well-being of the children and aim to promote physical activity within the school.

The Sport Premium Funding has enabled the children to have many more opportunities to develop their skills and to become more involved in PE and Sport.
