

## Feedback on workshop attended on 26th September.

Hello! I attended the workshop last night as an introduction to the foundation stage and I was very happy with it. I found the information useful and not too overwhelming. I thought the teachers were great, and it was very brave of them to get up and 'teach' all the adults too. It has given me lots of ideas to help Sam at home, and has helped me understand some of the terminology he has used already (for example "chopping" up words to segment them!)

I appreciate that it was a late night for the teachers, and I am so grateful to them!  
Thank you for a very useful and enjoyable evening.  
Cathy

I was really impressed by the curriculum workshop yesterday.

I came away with some useful tips to help with home learning.

It was also helpful to be taught in the style the children are taught, so there is consistency in the way we do things at home.

I think the duration of the workshop was perfect. It was rushed and it didn't go on too long.

It was great you put on two workshops (afternoon/evening session) as this gave people the chance to attend one or the other if they were working.

It might be useful if the workshops were on different days in case people aren't able to make that particular day of the week.

Thank you for your help and support. James is excited to come to school and is happy to practice things at home (which has never happened before!). You are miracle workers!!!!
